## Investment Performance Report April 1, 2008 to June 30, 2008

MSRP

The results shown represent past performance and do not represent expected future performance or experience. Past performance does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's units or shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the data quoted.

Performance data current to the most recent month-end may be obtained by visiting: [MarylandDC.com](http://MarylandDC.com). Please consider the fund's investment objectives, risks, and charges and expenses carefully before investing. The underlying fund prospectuses contain this and other information about the investment company. Prospectuses are available by calling 1-800-545-4730. Read carefully before investing.

Gross expense ratios represent the fund's total operating expenses expressed as a percentage of the assets held in the fund. For more information about gross expense ratios, read the fund's prospectus. The rates of return do not reflect a maximum deduction of a 0.19% annual plan asset fee, which, if reflected, would reduce the performance shown. No account will be charged more than \$2,000 for the year. The rates for the Investment Contract Pool are after the deduction of any carrier charges. Please see other important disclosures at the end of this report.

## RISK DISCLOSURES

**Money market funds: Investment in the fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other federal government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.**

The money market current yield is the annualized historical yield for the 7-day period ending on the last day of the calendar quarter. Yield quotation more closely reflects the current earnings of the money market fund than the total return quotation.

**T. Rowe Price Retirement Income Funds:** The performance and risks of each Retirement Fund will directly correspond to the performance and risks of the underlying funds in which it invests. By investing in many underlying funds, the Retirement Funds have partial exposure to the risks of many different areas of the market. The more a Retirement Fund allocates to stock funds, the greater the expected risk. Underlying fund expenses are proportional to the expenses of the acquired funds in which they invest.

**International/emerging markets funds:** Investing internationally involves risks not associated with investing solely in the U.S., such as currency fluctuation, political risk, differences in accounting and the limited availability of information.

**Small company funds:** Stocks of small or emerging companies may have less liquidity than those of larger, established companies and may be subject to greater price volatility and risk than the overall stock market.

**Bond funds:** Bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the fund.

**Non-diversified funds:** Funds that concentrate in a specific sector or focus on a relatively small number of securities may be subject to greater volatility than a more diversified investment.

**Government bond funds:** While the fund invests primarily in the securities of the U.S. government and its agencies, the fund's value is not guaranteed by these entities.

**Real estate funds:** Real estate investing entails the risks of real estate business generally, including sensitivity to economic and business cycles, changing demographic patterns and government actions.

Some mutual funds may impose a short term trade fee. Please read the underlying prospectuses carefully.

### IMPORTANT DISCLOSURES

**Investment Contract Pool** available for 457, 401(k) and 401(a) plans only.

**Vanguard Prime Money Market Fund** available for 403(b) plan only.

Investing may involve market risk, including the possible loss of principal.

Inception Date is the date the underlying fund was established. Some mutual funds may impose a short term trade fee. Some funds may be subject to a trade restriction policy. Please read the underlying prospectus carefully.

**Market indices have been provided for comparison purposes only; they are unmanaged and no fees and expenses have been reflected here. Individuals cannot invest directly in an index.**
