Introduction

The Board of Trustees of the Maryland State Employees Supplemental Retirement Plans hereby adopts this Statement of Investment Policy (Statement) for the Supplemental Retirement Plans.

The Plans are long-term retirement savings vehicles and are intended as sources of retirement income for eligible participants. The Plans vehicles are available for voluntary participation for those eligible participants who wish to bridge the gap between the State Pension Plan, Social Security, and their own retirement needs. The investment options available from the Plans cover a broad range of investment risk and rewards appropriate for this kind of retirement savings program. Participants bear the risk and reap the rewards of investment returns that result from the investment options they select.

This Statement of Investment Policy serves the following purposes:

- To ensure that a broad range of investment options are offered to participants in the Plans;
- To establish an investment program that will allow participants the opportunity to structure an investment strategy that meets their individual return objectives and risk tolerances;
- To define the investment categories offered by the Plans;
- To establish investment objectives for each investment category offered within the Plans;
- To establish benchmarks and performance standards for each investment category and to evaluate each option's performance against appropriate benchmarks and standards;
- To establish a procedure for reporting and monitoring of the various strategies/funds;
- To define the selection criteria for the Plans' investment options;
- To define the procedures for investment strategy/fund evaluation and formal strategy/fund review; and
- To set guidelines and procedures for withdrawal of an investment option which, in the Board's opinion, does not, or will not, fulfill the Plans' objectives for which it was selected and replace the option with an appropriate substitute.

Part of the investment process will be an initial stage of monitoring the Plans' investments by the Board's Investment Committee. The Investment Committee will follow the guidelines and processes of this Statement and provide recommendations to the Board for final action.

This document is intended to be dynamic and should be reviewed periodically and revised when appropriate.

I. Investment Categories

The Plans may, but are not limited to offering the following investment categories:

CATEGORY

Cash Equivalent

Bond

Balanced

Lifecycle/Target Date

Domestic Large Cap

Domestic Mid Cap

Domestic Small Cap

Non-U.S. Equity

Within each category of investment, the Board expects to offer between one and five individual investment options. The Board recognizes that within a category, the investment style (e.g. value, growth, and core) may differ between investment options.

Each investment option offered under the Plans shall:

- Operate in full accordance with its current published prospectus, “fact sheet,” or guidelines;
- Have its performance results measured against the applicable performance standards described herein for that investment category.

If the Board determines an investment option no longer meets the performance criteria and best interests of the Plans’ participants, it may remove and/or replace that option with a suitable alternative pursuant to the investment option evaluation procedure outlined herein. From time-to-time, the Board, in its discretion, may add investment options/categories to the current core options. At such time, the Statement of Investment Policy will be modified.

II. Investment Objectives and Policy and Performance Standards

The Plans may offer at least one investment option within each of the investment categories listed in Section II. Performance standards, benchmarks, and peer groups for each option in the Plans are outlined in the Appendix. Options in each category may be actively or passively managed. For each category, the investment style and investment objective are as follows:

Cash Equivalent

Investment Style: Cash Equivalent Option

Objective: The objective of this investment category is to preserve principal and provide a stable, competitive rate of return. An option in this category invests primarily in high quality fixed income instruments with maturities of short duration, guaranteed investment contracts (GICs) and other fixed income instruments that may be covered by a principal guarantee wrap agreement.

Bond Option

Investment Style: Bond Option

Objective: The objective of this investment category is to invest primarily in fixed income obligations of the U.S. Government, its agencies and instrumentalities, investment grade corporate securities, mortgage and asset backed securities. Limited exposure to higher yielding and non-U.S. securities is also acceptable (no more than 30% of the portfolio). Investment returns are expected to be derived primarily from current income.

Balanced Option

Investment Style: Balanced Option

Objective: The objective of this investment category is to invest in a combination of fixed income and equity securities. Investment returns are expected to be derived from both current income and capital appreciation.

Lifecycle /Target Date

Investment Style: Target Retirement Options

Objective: The objective of this investment category is to invest in a customized portfolio of fixed income and equity securities that changes its asset allocation strategy throughout a participant's investment horizon, becoming more conservative as a participant nears retirement. Investment returns are expected to be derived from both current income and capital appreciation.

Domestic Large Cap Equity

Investment Style: Large Cap Value Equity

Objective: The objective of this investment category is to invest primarily in the common stock of large capitalization domestic companies considered by the investment manager to be undervalued relative to the market. Investment returns are expected to be derived primarily from capital appreciation and, to a lesser degree, dividend income.

Investment Style: Large Cap Core Equity

Objective: The objective of this investment category is to invest primarily in a broadly diversified portfolio of U.S. equity securities issued by companies defined as large cap (generally \$10 billion and greater in market capitalization). Investment returns are expected to be derived primarily from capital appreciation and, to a lesser degree, dividend income.

Investment Style: Large Cap Growth Equity

Objective: The objective of this investment category is to invest primarily in the common stock of large capitalization domestic companies considered by the investment manager to have above average growth prospects. Investment returns are expected to be derived primarily from capital appreciation.

Mid and Small Cap Domestic Equity

Investment Style: Mid Cap Value Equity

Objective: The objective of this investment category is to invest primarily in the common stock of medium capitalization domestic companies (generally \$2 billion to \$10 billion in market capitalization) considered by the investment manager to be undervalued relative to the market. Investment returns are expected to be derived primarily from capital appreciation.

Investment Style: Mid Cap Core Equity

Objective: The objective of this investment category is to invest primarily in a broadly diversified portfolio of the common stock of medium capitalization domestic companies (generally \$2 billion to \$10 billion in market capitalization) considered by the manager either to be undervalued or to have above average potential for capital appreciation. Investment returns are expected to be derived primarily from capital appreciation.

Investment Style: Mid Cap Growth Equity

Objective: The objective of this investment category is to invest primarily in a broadly diversified portfolio of equity securities of medium capitalization domestic companies (generally \$2 billion to \$10 billion in market capitalization) considered by the investment manager to have above average potential for capital appreciation. Investment returns are expected to be derived primarily from capital appreciation.

Investment Style: Small Cap Core Equity

Objective: The objective of this investment category is to invest primarily in the common stock of small capitalization domestic companies (generally \$2 billion and less in market capitalization)

considered by the investment manager to be undervalued relative to the market or have above average potential for capital appreciation. Investment returns are expected to be derived primarily from capital appreciation and, to a lesser extent, dividend income.

Non-U.S. Equity

Investment Style: Non-U.S. Equity

Objective: The objective of this investment category is to invest primarily in the common stock of companies located outside the United States. Investment returns are expected to be derived primarily from capital appreciation.

III. Reporting and Monitoring Procedures

The Board will review the Plans quarterly, including review of the following:

- Current trends and developments in the capital markets (market review);
- The current level of diversification provided by the investment categories and options offered by the Plans;
- Changes in the investment management staff related to each investment option (organizational review);
- The continued consistency between the stated investment guidelines of each investment option and the Plans' policies;
- The compliance of each investment option with stated investment guidelines (review of the holdings and characteristics of each investment option), including style drift analysis;
- The compliance of each investment option's risk and return characteristics with the expectations stated herein (performance review).

IV. Environmental, Social, and Governance (ESG) Consideration

The Board prefers investment managers and funds that integrate ESG responsible policies and/or criteria in their investment philosophy and security selection process. While considering these criteria, it is understood that the primary goal remains offering investment options with a risk return profile competitive to their asset class.

V. Investment Option Evaluation

The Board, in its discretion, may conduct an informal review and evaluation of an investment option at any time.

The Board retains the authority to periodically, but not less than annually, evaluate and if appropriate take prudent action regarding investment options. The performance standards outlined in this document apply to all investment options in the Plans. Each standard shall apply independently to the portfolio of each investment option and is expected to be achieved net of investment management fees and expenses. In the event a new vehicle or share class is created for an existing investment strategy, which meets the criteria below, the Board may consider proxy data for the existing vehicle for consideration of the new vehicle and for ongoing monitoring purposes.

If an investment option fails to meet the minimum standards of investment performance outlined in this document, or qualitative reasons exist for the Board to take action, the Board will determine which of the steps detailed below should be taken. The Board may, in its discretion, if circumstances warrant, postpone this process in whole or in part, follow these procedures as written or in another chosen sequence, or proceed directly to Step 2.

Step 1. The investment option will immediately be placed on watch. Retention at the end of a one-year period will be contingent on the following:

- Actively managed options must perform above the passive benchmark index (passive funds must be equivalent to the benchmark index) over the past three- and five-year periods; or
- The investment option must perform above the median of its fund universe over the past three-year periods; or
- The investment option must provide superior risk adjusted returns over the three-year period; or
- The investment option must perform in the top quartile of its fund universe over the past one-year period; and
- Standard deviation (risk/volatility) of returns must not exceed 120% of the relative index over the three-year period; and
- Performance over these periods will be reviewed to justify retention.

Investment options which do not satisfy the retention criteria at the end of that one-year period may be replaced.

At any time deemed prudent, the Board may suspend contributions to the investment option from existing participants and may close the option to new participants. Upon completion of the evaluation, the Board may continue the investment option under formal review status, remove the option from formal review, or terminate the option.

Step 2. An investment option search will be initiated, and a replacement option selected. Regarding the Plans' assets already deposited with the investment option, the option will be closed and assets transferred to the replacement option or the option of the participant's choice.

Additionally, the Board may place an investment option under formal review, terminate an option, or “freeze” an option to new contributions for reasons other than investment performance, including:

1. The option has changed investment manager, or such change appears imminent;
2. The option has changed sub-advisor;
3. The option has had a significant change in ownership or control;
4. The option has changed investment focus or has experienced style drift, departing from the investment category or objectives or parameters in its prospectus or “fact sheet” or guidelines;
5. The option has violated a SEC rule or regulation; as well as any other important and appropriate statutory regulatory requirements;
6. The option has operational difficulties concerning transfers or pricing; or
7. The option has experienced significant asset growth/decline deemed as potentially detrimental to the investment manager’s ability to manage the investment option effectively in the future.
8. A materially more advantageous opportunity exists for participants in replacing an existing investment option with a new opportunity.

VI. Selection Criteria for Investment Options

The following outlines the selection criteria to be used, if the need arises, to replace an existing investment option, or if a new option is to be added to the Plan(s). To be eligible for the initial screen, an investment option should meet the following minimum criteria:

- Have a minimum track record of three years (five years is preferable but may not be realistic in some asset classes);
- Have a minimum of \$100 million in assets in total strategy; or
- Have the MSRP investment represent no more than 10% of the total strategy assets; and
- Have above peer group median performance for each of the last 3 and 5-year periods; or
- Have favorable risk adjusted performance over the last 3 and 5 year periods; and
- Be open to new investors;
- Have no load (front end or deferred sales charges) or be willing to waive the load and be willing to negotiate rebates on fee structure;
- Have the option characteristics of the appropriate investment category as outlined in this document.

The primary evaluation criteria to be used in the selection of investment options, which satisfy the above:

- One-, three-, and five-year rates of return (net of operating expenses and annualized for time periods longer than one year);
- Risk measures including annualized standard deviation and tracking error;
- Three- and five-year risk/return ratio and information ratio;
- Fund expense ratio or investment management fees;
- Investment objective(s) and portfolio strategy;
- Tenure/experience of portfolio manager(s);
- Portfolio composition (asset classes and sector concentrations).

Lifecycle/Target Date funds (also known as, asset allocation investments) differ from single asset class investments and necessitate additional layers of review as well as different criteria for monitoring. Unlike other investments which are monitored individually, target-date investments should be monitored individually and evaluated as a group. Due to the unique importance of these investment options for participants in the Plans, asset allocation investments failing to achieve criteria standards should be carefully reviewed before removal from the Plans.

In the event asset allocation investments have a time history too brief to meet the criteria listed above, the investment or suite should be evaluated both qualitatively and quantitatively on the underlying investments that may have a longer time history available, using a proxy, or a qualitative framework for all other instances.

A critical component for the Board to consider in selection, and ongoing monitoring, of an asset allocation investment is its glidepath. The optimal glidepath should reflect the participants'

demographics and usage of the Plans. The following criteria should be considered in the selection, and ongoing monitoring, of an asset allocation investment:

- The Plans' objectives, including, but not limited to: the collection of other Plans available to participants in the aggregate (such as the State pension plan); potentially impactful additional Plan design elements (*i.e.*, automatic features, level of matching contributions, etc.); whether the Board's objectives in offering an asset allocation investment have changed; whether proprietary, custom, or nonproprietary solutions best meet the objectives of a prudent number of eligible employees; whether a single or multiple glidepath approach would be most prudent for the demographics of the eligible employee population; and whether the glidepath, equity landing point, and age 65 equity exposure most closely meet the objectives of a prudent number of eligible employees; and
- The Plans' demographic information, including, but not limited to: participant deferral rates, account balances and participants' general degree of investment knowledge (level of investment sophistication).

Other considerations may include:

- Whether there have been significant changes in the asset allocation investment's investment strategy or management team;
- Whether the fees and expenses of the asset allocation investment are reasonable given the investment management (including glidepath construction, rebalancing, etc.) involved;
- Additional information such as number, and construct, of asset classes used to promote diversification and growth potential within each asset allocation investment; and
- The management style of the underlying investments, be it passive, active or a core-satellite approach.

VII. Termination of Fund

When the Board terminates an investment option:

1. The Board, or its designee, will promptly notify the Plans' provider that the investment option is being terminated.
2. The Board, or its designee, will promptly notify participants in the Plans who are currently investing in the investment option that the Board is terminating the option as an investment option under the Plans and that:
 - a. New investment monies will be redirected to another option under the Plans prior to the termination date of the option;
 - b. All assets in the terminated option will be transferred to another option prior to the termination date of the option; and
 - c. Assets not transferred by participants to alternate investment options by the termination date will be automatically transferred to a replacement option or a designated default option.

VIII. Expense Standard

The Board will review the fee structure of the options at least annually. Expenses for each of the options should be competitive within each investment category.

IX. Investment in Collective Investment Trust Vehicles

When the Board invests or contributes assets, on behalf of the Plans, to collective investment trust vehicles, the terms of the documents governing the collective investment vehicle occasionally require the Board, on behalf of the Plans, to adopt certain provisions of trust documents governing the collective investment trust vehicle, all as provided under the terms of the trust documents.

Attached as Appendix B to this Statement, as such appendix may be amended from time to time without further action of the Board, is a list of documents adopted as part of this Statement in connection with an investment in or contribution of assets of the Plans to a collective investment trust vehicle. Copies of the documents referenced in Appendix B may be obtained from the Executive Director and Secretary of the Board.

X. Exempt Procurement Policies and Procedures

Policy Statement

Pursuant to State Personnel and Pensions Article (“**SPP**”) §35-302(C) of the Annotated Code of Maryland (the “**Maryland Code**”), the Maryland Supplemental Retirement Plans (the “**Plans**”) are exempt from the applicability of the State’s procurement laws for:

- **Investment Managers.** Services of managers to invest the assets deposited and invested in investment options of the Plans in accordance with statements of investment policies (including this Statement) adopted by the Board of Trustees (the “**Board**”) of the Maryland Supplemental Retirement Plans (referred to herein as “**MSRP**,” when referring to the State agency through which the Board administers the Plans) from time to time;
- **Management, Maintenance and Enhancement of Value of Plan Assets.** Expenditures to manage, maintain, and enhance the value of assets deposited and invested in investment options of the Plans selected in accordance with such statements of investment policies; and
- **Custodial Banking Services.** Expenditures for the safe custody, domestic or global, of assets deposited and invested in investment options of the Plans in accordance with SPP §35-302(b), which authorizes the Board to make arrangements for the safe custody, domestic or global, of investments with one or more duly qualified custodian banks or trust companies.

One exception to the Plans’ exemption from the State’s procurement laws is the requirement that the Board adopt written policies and procedures with respect to these exempt procurements in accordance with State Finance and Procurement Article (“**SFP**”) §12-401 of the Maryland Code. As required, these policies and procedures relate to (i) the types and methods of procurement; (ii) the advertising requirements; (iii) the procurement goals, including minority business enterprise participation; and (iv) the approval process for each procurement type.

Types of Procurements Exempted

This exemption relates primarily to the procurement by the Plans of the Investment Options (as hereinafter defined) of the Plans. Each of the Plans maintains a Plan document,¹ which, *inter alia*, authorizes the Board to designate categories of investments into which Plan participants may specify investment of their Plan contributions. Pursuant to this authority, the Board may select for participant designation such investments as it deems appropriate, including regulated investment companies (commonly known as mutual funds), annuity or investment contracts, real estate investment trusts, exchange traded funds or trusts or common investment pools composed of stocks or bonds, as well as a Stable Value fund (as described in the Plan documents) (referred to in this Section IX collectively as “**Investment Options**” and each individually sometimes referred to as an “**Investment Option**”).

¹ Plan documents for each of the Deferred Compensation 457(b) Plan, Savings and Investment 401(k) Plan, Tax Sheltered Annuity 403(b) Plan, and 401(a) Match Plan are available on MSRP’s website at [Maryland 457 Plan Document](#); [Maryland 401\(k\) Plan Document](#); [Maryland 403\(b\) Plan Document](#); and [Maryland 401\(a\) Plan Document](#).

The Plan documents provide that an Investment Option does not need to be generally available to the public in order to be included in the investment lineup of the Plans, and the authorization includes the ability of the Board to select the entities to manage the various Investment Options.

The procurement of the manager of the Stable Value Fund is included in the procurement exemption pursuant to SPP §35-302(c)(1).² The exemption afforded to the Plans under SPP §35-302(c)(2) governs expenditures to manage, maintain, and enhance the value of the assets in the Plans. Examples of these general investment-related services include, but are not limited to, transition managers, securities litigation monitors and claims evaluators, and investment research services. SPP §35-302(c)(3) exempts procurements of custodial banking services. The applicability of this procurement exemption to other investment-related services to be procured by MSRP will be considered on a case-by-case basis as investment-related needs of the Plans arise and in consultation with the Office of the Attorney General.

Pursuant to SPP §12-401(c)(2), the Board shall review these Exempt Procurement Policies and Procedures and approve any necessary changes hereto on a periodic basis, but no less frequently than once every fiscal year in conjunction with the Board's review of this Statement in its entirety.

Policy Guidelines

Investment Managers (§35-302(c)(1))

For procurement of Investment Options.

Method of Procurement

The Board may engage an investment advisor (the “**Investment Advisor**”) to advise the Board regarding the Investment Options available to Plan participants pursuant to one or more agreements. This contract will be procured by the Board in accordance with the State's procurement laws and each such contract will generally have a term of five (5) years, which in certain instances may be extended when such extension has been deemed necessary and appropriate by the Board and duly approved by the appropriate units of State government (*i.e.*, the Department of General Services and, if required, the Board of Public Works).

Section V of this Statement sets forth the selection criteria for Investment Options, which includes minimum criteria for the initial screen of such Investment Options, as well as the primary evaluation criteria for an Investment Option. In directing an Investment Advisor to perform a search for an Investment Option, the Board may set additional parameters for a search (*e.g.*, investment category and style, number of Investment Options to present for consideration of the Board) at the time the Board makes the decision to begin the search process.

² As of the date of the initial adoption of these Exempt Procurement Policies and Procedures (August 2019), the manager of the Stable Value Fund was under contract with the Board to provide management services under such contract until January 31, 2021. Such contract was procured in accordance with the State's procurement laws in effect at the time of the release of the request for proposals for Stable Value Fund Management Services. The subsequent Stable Value Fund manager contract with the Board, in effect until December 31, 2026, was procured in accordance with these Exempt Procurement Policies and Procedures.

Policies and procedures for reporting on and monitoring, evaluating, and terminating Investment Options are set forth in **Section III**, **Section IV**, and **Section VI**, respectively, of this Statement.

Advertising Requirements

The Board relies on the Investment Advisor's access to national and international financial databases in providing its list of potential Investment Options and recommendations for Investment Options for the Plans for Board consideration.

Procurement Goals

The Board's goal is to search for, select, and maintain Investment Options managed by qualified investment and portfolio managers that meet the objectives of the Plans and the standards set forth in this Statement.

Approval Process

The Board shall approve all procurements related the participation of the Plans in an Investment Option. Following such approval, the Executive Director and Secretary of the Board is authorized, directed, and empowered to execute and deliver on behalf of the Board any and all documents and take any and all actions necessary and appropriate in order for the Board's approval to be carried out to the fullest extent; *provided, however*, that the Office of the Attorney General shall approve all documents legally binding the Board, MSRP, and/or the Plans or otherwise requiring execution by the Board, MSRP, and/or the Plans for form and legal sufficiency.

Expenditures to manage, maintain, and enhance the value of assets (§35-302(c)(2))

For expenditures to manage, maintain, and enhance the value of the assets deposited and invested in Investment Options of the Plans selected in accordance with this Statement.

Method of Procurement

The Board will use a competitive procurement process using a Request for Proposal (RFP) or a Request for Information (RFI), or such other procurement method, including a sole-source procurement, as determined by the specific details of the procurement, *provided that*, in order to use the sole source procurement method, the Board shall require a justification for the use of such procurement method from the agency's procurement officer, or agency staff acting in such capacity, which justification shall (a) also be approved by the Executive Director; (b) provide that a competitive source selection method cannot be used because there is only one available source for the subject of the contract or such other reason as deemed appropriate in the circumstances, including, without limitation, the consideration of the timing deemed necessary for the implementation of a Board decision, and in the best interest of the Plans and the participants of the Plans; and (c) be in writing and attached or otherwise appended to the resolutions approving such procurement method.

Advertising Requirements

The Board will advertise via multiple avenues, which may include eMaryland Marketplace Advantage (eMMA) and/or the MSRP website.

Procurement Goals

Each investment-related service provider shall be selected to meet specific investment objectives and standards. The Board encourages the inclusion of minority business enterprises. Service providers shall be subject to a level of due diligence that reflects a level of rigor that is commensurate with the importance and materiality of the service to be provided.

Approval Process

The Board shall approve all procurements related to service providers. Following such approval, the Executive Director and Secretary of the Board is authorized, directed, and empowered to execute and deliver on behalf of the Board any and all documents and take any and all actions necessary and appropriate in order for the Board's approval to be carried out to the fullest extent; *provided, however*, that the Office of the Attorney General shall approve all documents legally binding the Board, MSRP, and/or the Plans or otherwise requiring execution by the Board, MSRP, and/or the Plans for form and legal sufficiency.

Custodial Banking Services (§35-302(c)(3))

For expenditures for the safe custody, domestic or global, of investments as provided under SPP §35-302(b).

Method of Procurement

To the extent that custodial banking services are not otherwise provided under other contracts with the Board, the Board will use a competitive procurement process using a Request for Proposal (RFP) or a Request for Information (RFI), or such other procurement method, including a sole-source procurement, as determined by the specific details of the procurement, *provided that*, in order to use the sole source procurement method, the Board shall require a justification for the use of such procurement method from the agency's procurement officer, or agency staff acting in such capacity, which justification shall (a) also be approved by the Executive Director; (b) provide that a competitive source selection method cannot be used because there is only one available source for the subject of the contract or such other reason as deemed appropriate in the circumstances, including, without limitation, the consideration of the timing deemed necessary for the implementation of a Board decision, and in the best interest of the Plans and the participants of the Plans; and (c) be in writing and attached or otherwise appended to the resolutions approving such procurement method.

Advertising Requirements

The Board will advertise via multiple avenues, which may include eMaryland Marketplace Advantage (eMMA) and/or the MSRP website.

Procurement Goals

Each service provider shall be selected to meet specific performance standards for services related to the safe custody of investments, which includes a broad array of services that a custodian is uniquely in a position to perform, including, but not limited to, the execution of currency transactions, the management of collateral for derivative investments, compliance and performance reporting, and some investment-related services. The Board encourages the inclusion of minority business enterprises.

Approval Process

The Board shall approve all procurements related to custodial banking services. Following such approval, the Executive Director and Secretary of the Board is authorized, directed, and empowered to execute and deliver on behalf of the Board any and all documents and take any and all actions necessary and appropriate in order for the Board's approval to be carried out to the fullest extent; *provided, however*, that the Office of the Attorney General shall approve all documents legally binding the Board, MSRP and/or the Plans or otherwise requiring execution by the Board, MSRP and/or the Plans for form and legal sufficiency.

XI. Political Contributions and Placement Agents

Policy Statement

It is the policy of the Board that the contractual arrangements governing its investments with external investment managers, including managers and general partners of private funds, if applicable, shall include language requiring that any political contributions or use of placement agents be consistent with certain rules of the Securities Exchange Commission (the “**SEC**”). Namely, the language requires compliance with the SEC Rule 206(4)-5 (the “**Political Contributions Rule**”), SEC Rule 206(4)-3 (the “**Solicitations Rule**”), and, in part, SEC Rule 204-2 (the “**Books and Records Rule**”). Additionally, it is the policy of the Board that the Plans shall not bear the economic cost of placement agents. Finally, it is the policy of the Board that the Plans shall receive an annual certification regarding compliance in these matters.

The transaction documents resulting from any negotiation with an external investment manager, including managers and general partners of private funds, if applicable, shall contain, in substance, the following representations and agreements by the manager, general partner, or fund (as applicable):

- That no fees have been paid by the manager, general partner, or fund (as applicable) to solicit investment or advisory business from the Board, MSRP, or the Plans in a manner that would violate the Solicitations Rule;
- That the Plans will not bear, directly or indirectly, any fees or expenses paid by the manager, general partner, or fund (as applicable) to a placement agent, unless, in the case of a private fund, such amounts are apportioned *pro rata* and completely offset by corresponding fee reductions;
- That no actions have been taken by the manager, general partner, or fund (as applicable), or certain of their agents, that would violate the Political Contributions Rule; and
- That the manager, general partner, or fund (as applicable) will, in accordance with the Books and Records Rule, keep books and records regarding compliance with the Political Contributions Rule and the Solicitations Rule and provide the Board with access to such books and records.

The final transaction documents shall also require the manager, general partner, or fund (as applicable) to certify, on an annual basis, its compliance with the foregoing representations and agreements.

This policy applies to contractual arrangements with all external investment managers, including managers and general partners of private funds, if applicable, other than registered investment companies, which the Board believes provide sufficient disclosure with respect to such registered investment companies and their investment advisers regarding the above matters, in accordance with the requirements of the Investment Company Act of 1940, as amended, and the Investment Advisers Act of 1940, as amended, and the respective rules and regulations promulgated thereunder. This policy also applies regardless of whether those entities would otherwise be required to comply with the Political Contributions Rule and the Solicitations Rule.

This Statement of Investment Policy is adopted by the Board of Trustees of the Maryland State Employees Supplemental Retirement Plans on January 26, 2026.
